On January 7th 2005 asylum seeker Oury Jalloh of Sierra Leone was combusted at the Dessau Police Station – hogtied by 4 shackles onto a fire proof matress in a tiled Police detention cell...

International experts assigned by the Initiative in Remembrance of Oury Jalloh will soon deliver reasons to “burning” questions about the legal case of Oury Jalloh

Invitation to the Press Conference in Berlin on 27th of October 2015

The Initiative has entrusted renowned fire investigators, toxicologists and forensic pathologists who are independent from German authorities to carry out thorough review, re-evaluation and re-assessment of available court files, official investigation records and self-implemented experts opinions (2005 second autopsy and 2013 fire expertise) as to elaborate clarifying answers to the questions that arose from the 2013 fire expert opinions of the assigned thermic physicist Mr. Maksim Smirnou.

We proudly look forward to present to you the results of these fire expert, toxicological and forensic analysis of the unprofessional to unsuitable, biased and actively manipulated criminal investigations of the case in presence of the scientists in charge and other experts under moderation of members of the Initiative at our press conference on...

Tuesday 27th of October 2015
starting at 10 a.m. at
Haus der Demokratie und Menschenrechte Berlin
(House of Democracy and Human Rights)
Greifswalder Straße 4
10405 Berlin – Prenzlauer Berg

You are hereby cordially invited to take part in this press conference. We will not only provide original language of the participants to you but also simultaneous translations via audio line.

After the actual presentation of the results you are invited to ask further questions through the moderation of the podium and then to record personal interviews with lawyers and prosecutors involved in the case as well as with representatives of our Initiative.

The criminal investigation authorities in charge of the federal state of Saxony-Anhalt have been codifying the assumed course of events that led to Oury Jalloh's death already prior to the actual crime scene investigation on January 5th 2005: Oury Jalloh has allegedly set the fire to the fire proof matress himself (<https://vimeo.com/79113052> [en] min. 1:09 to 2:00).

No fire expert investigator was called in to the crime scene. No arson device was found at the crime scene in police cell no. 5. Any sort of verification for combustive agents was precautionary neglected.

It then happened 3 days later on January 10th 2005 that a melted plastic lighter was presented that allegedly materialized out of one of the evidence bags containing the fire debris ensured from the crime scene. Subsequent forensic analysis of this lighter "evidence" some years later in 2012 revealed that there were no traces present at the crime scene in cell no. 5 could be found to have been melted or adhered to that very lighter – but then again different textile fibers and 2 animal hairs were detected, of which some have obviously had not been previously exposed to destructive heat, which implies that those traces did actually adhere to this lighter in a different melting fire than that in question.

All these „incidents“ strongly substantiate the false flag „investigation“ of the public prosecution office in charge of Dessau-Roßlau that right from the beginning intended to prove, “...*that there at least should have been the notional feasibility for him (Oury Jalloh) to have caused his own death*” – as it was expressed by the senior public prosecutor Mr. Folker Bittmann at the one and only press conference that was held by his office on the “tragic incident” – how the murder is called in official linguistic ruling. (https://www.youtube.com/watch?v=-4kCT_DasH4 [German only-sorry] min. 9:17 to 11:11).

Due to persistent denial of unbiased investigations of the actual circumstances of Oury Jalloh's death by public prosecution and various courts, the Initiative engaged right from the beginning into collateral and independent inquisition of forensic experts in the matter. Thus the initiation of court proceedings could only be enforced through a second autopsy funded by public donations. This second became crucial after repeated requests for admission of x-ray evidence to exclude bony injuries of the dead body of Oury Jalloh which have been rejected once and again by the prosecution office, arguing that the course of death due to fire has already been established beyond any doubts. Through this second autopsy a broken nose, fractures of the ethmoid bone and a torn eardrum have been detected.

2013 the Initiative commissioned the external fire expert Maksim Smirou from Ireland to reproduce circumstances, course and effects of the fire that took place in police cell no. 5 by performing comparative experiments. This step was taken after the judges of the than responsible chamber of Magdeburg Regional Court did repeatedly refused to admit further evidence of the joint plaintiffs to perform result oriented fire test in order to comprehend the development, performance and the devastating result of the blazing fire in question.

The enlightening conclusion of his independent expert opinions:

The ravaging outcome of the effects of the fire in cell no. 5 could only be achieved by using an essential amount of fire accelerant...
